

Members Present- Chairman Josh Fromm, Finos Lunsford, John Burdette

Attendees- City Administrator Leahnette Rivers and Micah Rogers

Meeting Called to Order at 5:58 pm

The water board is very pleased with the well's current performance. It is pumping around 170gpm. With the exception of Public Works maintenance windows, we have not purchased water from St. Helens in almost twelve months. 2011 was the best performance of our system yet.

Well #1 (the little one) is now back online and will work as a backup, or in unison with the Main Well. Micah is working on having it hooked to the computer in his office.

A Water Facilities Master Plan/ Water Master Plan is in the works.

We will begin a water study with grant funds, and have applied for an automated water meter grant.

Leahnette is also applying for a drinking water protection grant.

Adjourned at 7:03 pm.
