

The City of Columbia City

In Columbia County on the Columbia River

November 21, 2024

Water Service Line Inventory Completed for Lead & Copper Rule Revision

The Columbia City Municipal Waterworks inventoried all water service lines in the system and determined there were no lead service lines. This determination was made using construction records, construction dates, maintenance and replacement records, and visual inspection.

The Lead and Copper Rule applies to all Community (CWS) and Non-Transient (NTNC) public water systems. EPA adopted revisions to the Lead and Copper Rule in 2021 that include a requirement for public water systems to conduct inventories of service lines and to identify service line material type. The intent of the service line inventory requirement is to identify those service lines made of lead so that they can be scheduled for removal and replacement.

The inventory of our service lines has been submitted to, and approved by, the Oregon Health Authority (OHA). Since no lead service lines were found in our system, no further action is required.

Feel free to contact me with any questions with the information below.

Respectfully,

Micah Rogers
